Regarding claims 1, 10, and 18 Prior Art fail to specifically teach that an antenna feed network mounted on a bottom surface of said first dielectric layer, said antenna feed network having a plurality of branch transmission lines electrically connected to each of said antenna elements, each of said branch transmission lines including a pair of probes positioned perpendicular to one another underneath one antenna element of said plurality of antenna elements, one of said pair of probes for each of said branch transmission lines having a length substantially greater than the other of said pair of probes for each of said branch transmission lines to provide for a ninety degree relative phase shift between RF signals transmitted through said pair of probes of each of said pair of branch transmission lines.

Claims 2-9 are allowed for depending on claim 1.

Claims 11-17 are allowed for depending on claim 10.

Claims 19-20 are allowed for depending on claim 18.
